# Anatolie Micaliuc

Product designer with 8+ years of experience in B2B SaaS

I've worked across the full spectrum: 0→1 startups, acquisitions, and enterprise platforms with dozens of teams and millions of users. Comfortable operating without a PM, running my own research, and bringing structure to ambiguous problems. I use AI throughout my workflow: research synthesis, rapid prototyping, and designing AI-native product flows.

## Skills

**Product & Strategy:** Enterprise UX · 0→1 design · Platform thinking · UX research · JTBD · Competitive analysis · Design audits · Cross-team collaboration · Stakeholder alignment · AI-native product design

**Craft:** UX/UI · Visual design · Interaction design · Design systems · Typography · Prototyping

**Tools:** Figma · FigJam · Cursor · Claude Code · Notion · Jira · Miro · Dovetail · Adobe CC

## Work

### Block / Square · Remote, May 2022 — March 2025

Senior Product Designer, Square for Franchises

Led end-to-end product design for Square for Franchises (SFF), Block's enterprise platform serving multi-location sellers and franchise brands.

- **Enterprise North Star Vision.** The product had grown reactively with no structural model for multi-location complexity. Synthesized 5 team roadmaps, customer interviews, and competitive analysis (Toast, Olo, HungerRush). Presented a phased vision to leadership that secured buy-in, unlocked funding for Location Groups, unblocked Enterprise Menus, and gave 4 teams a shared direction.
- **Checkout Redesign.** 30%+ of users dropped off before completing orders, the flow had accumulated 7 steps through async product decisions. Audited every entry point, ran competitive analysis, negotiated scope, and consolidated to a 2-step flow with guest checkout added for the first time. Result: conversion up ~5%, abandoned cart rate down 17%, time-to-complete down 22 seconds — shipped during an active design system migration.
- **Royalty Fee Collection.** Franchisors were managing royalties in spreadsheets and third-party tools. Designed a native solution inside the franchise dashboard, navigating cross-team dependencies with Square's invoicing infrastructure and scoping to the most common royalty model to ship without blocking on full platform availability. Adoption hit 26% in the first weeks; feature unblocked strategic enterprise deals where royalty collection had been a dealbreaker.
- **Full Platform Design.** Designed across all Square for Franchises services — menus, reporting, gift cards, loyalty, permissions, and native mobile app — for enterprise clients managing dozens of locations, millions in GPV, and large customer audiences.
- **Reporting Tools.** Shipped Discount, Royalty, Sales, Loyalty, and Gift Card reporting for franchisors — addressing complex cross-location reconciliation workflows with positive seller feedback at launch.
- **Design System Migration.** Drove SFF's UI migration to Square's Design System across multiple product surfaces, creating new components to fill gaps in the existing library.
- **Complexity Frameworks.** Created scalability and upmarket complexity frameworks covering bulk actions, location groups, navigation, and permissions — guiding design decisions across SFF's platform.
- **Brand Integration.** Led the rebranding of GoParrot into SFF, ensuring seamless integration into the Square ecosystem and consistent product communication.

## Work

### GoParrot · Remote, Dec 2019 — May 2022

Acquired by Block / Square, 2022
Lead Designer

Sole designer at a B2B/B2C SaaS startup enabling restaurants to launch branded online ordering platforms.

- **0→1 to acquisition.** Designed the product from blank canvas through scale, contributing to 4x MRR growth over two years and the company's acquisition by Square in 2022.
- **Franchise Suite.** Designed the Franchise Suite feature set that became central to Square's decision to acquire GoParrot.
- **Cross-functional leadership.** Led design from concept to implementation collaborating with a 27-person team (engineers, QA, PMs) and building relationships with stakeholders across the organization.
- **Research-driven process.** Ran user interviews, UX competitor analysis, and early-stage feature testing; created investor, sales, and marketing presentations.

### Freelance & Contract · Remote, 2016 — present

Lead Designer

Ongoing contract and freelance work across fintech, legal tech, foodtech, medtech, and B2B SaaS.

- **Alfa Bank (Cyprus subsidiary).** Designed internal investor portal — complex data-heavy private equity dashboard. Under NDA.
- **MP.kz.** UI/UX for Kazakhstan's government procurement platform, handling 50B+ KZT in annual tender volume.
- **Sz.kz.** Product design for one of the country's largest consumer platforms.
- **Parma CRM.** One of the founding designers from 0 to first clients, first sales, and acquisition.
- **Other clients:** Superlegal (AI legal tech), OryxNeuro (innovative medtech), Tunnel Tech, Import2, Conspectus, Business Youth, Slurm, Southbridge, and others.

### Grafica.kz · Remote, 2017 — 2019

Lead Designer

UI/UX, visual design, branding, and print work for clients including Verny Capital, KPMG Kazakhstan, Satty Zhuldyz. National Lottery, and Kolesa.
